OPPORTUNITY

Huawei is the largest telecommunications equipment manufacturer in the world and wanted to deploy networked AV to connect the war room with the rest of the facility.

SOLUTION

Huawei hired Intellismart Technology Inc. to install a complete HARMAN Professional Solutions Networked AV solution capable of streaming high definition audio and video seamlessly throughout the facility.

Huawei's war room has an 8' x 3' video wall system designed to control and display 18 different programs. With the new AMX SVSI control system, they can now control everything with a tablet."

HUAWEI TELECOMMUNICATIONS, PHILIPPINES

Intellismart Technology Inc. recently deployed a cutting-edge HARMAN Professional Solutions AV solution at Huawei for seamless video conferencing.

Huawei is the largest telecommunications equipment manufacturer in the world, with products and services available in over 170 countries. Specializing in information and communications technology and smart devices, Huawei is committed to bringing digital devices to every person, home and organization in the world. In order to facilitate more efficient communication across their network more than 180,000 employees, Huawei hired IT specialists Intellismart Technology Inc. to install a complete HARMAN Professional Solutions AV solution capable of streaming high definition audio and video seamlessly throughout the facility.

"Our biggest concern was being able to interface with Huawei's existing AV system," said Gerry Sy, President of Intellismart Technology. "Huawei's war room has an 8' x 3' video wall system designed to control and display 18 different programs. With the new AMX SVSI control system, they can now control everything with a tablet."

The Huawei facilities feature a networked AMX SVSI control system, JBL Professional speakers, Crown amplifiers, AKG microphones and BSS digital signal processors. The new system enables Huawei's war room to double as a venue for large meetings and video conferencing events. Thanks to the advanced AMX SVSI AV solution, Huawei are able to stream 4K HD video throughout their entire facility with unperceivable latency.

"The new HARMAN AV solution has been tremendously helpful in improving communication as well as efficiency here at Huawei," said Benzen N Magdasoc, IT Team Lead of Huawei. "The SVSI system offers more advanced features than our old system with simpler controls—allowing us to concentrate more on communication rather than the complexity of the tools."

“

The new HARMAN AV solution has been tremendously helpful in improving communication as well as efficiency here at Huawei”
