## HOUSES OF WORSHIP

### OPPORTUNITY

In order to ensure immaculate audio quality for meetings and lectures, Linh Phong Spiritual Dharma Complex directors needed a state-of-the-art networked audio system.

### SOLUTION

Ba Sao designed a complete state-of-the-art networked audio system, including solutions from JBL, Crown, Soundcraft, BSS and AMX.

“

The seamless integration and reliable performance of HARMAN products enabled us to produce quality results at Linh Phong Spiritual Dharma complex.”

### LINH PHONG SPIRITUAL DHARMA COMPLEX, VIETNAM

Located 400 feet above sea level amid Binh Dinh's lush mountainous terrain, Vietnam's Cat Tien National Park is home to the sacred Linh Phong Spiritual Dharma complex, which covers an area of 155 acres. Thousands of religious devotees make pilgrimages to Linh Phong to pay homage to ancient Buddhist traditions and worship at the foot of the 220-foot tall statue of Shakyamuni Buddha seated on a lotus flower, the tallest Buddhist statue in Vietnam. In order to ensure immaculate audio quality for meetings and lectures, Ba Sao Investment was hired to equip the Linh Phong Spiritual Dharma complex with a state-of-the-art networked audio system. Ba Sao selected a complete HARMAN networked AV system, comprised of solutions from JBL, Crown, Soundcraft, BSS and AMX.

“We're honored to have designed the sound system for one of Vietnam's most famous ancient spiritual resorts,” said Huu Tuan, Sales Manager, Ba Sao Investment. “The challenge was to deliver excellent sound quality, clarity and coverage to a huge area with speakers distributed along the 50-foot high ceiling. The seamless integration and reliable performance of HARMAN products enabled us to produce quality results at Linh Phong Spiritual Dharma complex. We use HARMAN solutions for a wide range of AV installation projects, and our clients are always satisfied with the quality of our audio systems.”

Ba Sao Investment met the challenge of distributing sound evenly throughout the large space by installing twelve JBL Control 12CT compact ceiling loudspeakers. Control 12CT speakers features a 3-inch driver mounted in a vented UV-resistant baffle, and its pre-attached backcan enabled the team to quickly and efficiently install the speakers in the 50-foot high ceiling. Ba Sao used Crown DCi DriveCore Install series amplifiers to supply clean and reliable power to the JBL Control 12CT ceiling speakers.

To enable easy day-to-day operation and scalability for future expansions, Ba Sao designed the system around an AMX NX-2200 NX Integrated Controller. The team also networked the audio system using a BSS Soundweb London BLU-100, which offers a fixed configuration of inputs and outputs and a low-latency fault-tolerant digital audio bus, providing the building blocks of a perfectly tailored system solution. For mixing of

input signals, Ba Sao included a Soundcraft Signature 12 console, which offers lots of headroom, superb signal-to-noise ratio and Sapphire Assymetric EQ for shaping the frequency response of every vocal microphone and instrumental element.

“It’s a huge privilege to see our products enhancing experiences for worshippers and tourists at Linh Phong Spiritual Dharma complex,” said Ramesh Jayaraman, VP & GM, HARMAN Professional Solutions, APAC. “HARMAN solutions are used widely in houses of worship, where balance, clarity and focused sound quality are essential for setting a pristine environment in which attendees can clearly understand the teacher’s spiritual messages. We thank Ba Sao Investment for relying on HARMAN products to successfully implement their innovative methods, technical expertise and customer-first approach.”
